PROFESSIONAL SUMMARY

Python Full Stack Developer with hands-on experience building backend services and full-stack web applications using Python, FastAPI, and React.js. Skilled in REST API development, JWT authentication, Redis integration, and Docker containerization, with working knowledge of PostgreSQL, MySQL, and MongoDB. Hands-on experience with Generative AI, including LLMs, RAG, vector databases, and prompt engineering. Seeking Python Full Stack, Python Backend, and GenAI Engineering roles to build scalable, AI-powered applications.

SKILLS

Programming : Python, JavaScript

Backend & APIs : FastAPI, Node, Express, REST APIs, JWT, OAuth

Generative AI : LLMs (Google Gemini, Open AI, Anthropic), Prompt Engineering, RAG, Vector Databases

Frontend : React.js, HTML5, CSS3, Tailwind CSS

Databases & Caching : PostgreSQL, MySQL, MongoDB, Redis

Cloud : AWS (EC2, S3, Lambda)

Tools : Git, GitHub, Docker, Postman

Core Skills : Full-Stack Development, Backend Development, API Integration, Problem Solving

WORK EXPERIENCE

Python Developer

June 2026 – Present

VCode Wonders – Puducherry

- Built AI-powered applications using Python, FastAPI, and PostgreSQL for real-world business use cases.
- Worked on client projects involving LLMs, RAG, and vector databases to build AI-powered features and workflows.
- Integrated AI capabilities into applications for resume analysis, job matching, interview preparation, and personalized learning.

Junior Software Developer cum Trainer

July 2025 – May 2026

Ocean Academy – Puducherry

- Delivered training on Python Full Stack and MERN Stack development to students.
- Developed scalable full-stack web applications.
- Built responsive, user-friendly interfaces with React.js and Tailwind CSS.
- Guided students in hands-on development, debugging and project execution.

Application Processing Officer

Aug 2022 – Jan 2025

Uniexperts - Puducherry

- Managed end-to-end international student admission processes, including application submission, offer letters, fee payments, and visa documentation.

- Coordinated with universities, sub-agents, and students to ensure timely processing and seamless communication throughout the admission cycle.

PROJECTS

PulpitLab – AI-Powered Sermon Preparation Platform

Website Link : pulpitlab.com

Tech Stack: Python, FastAPI, React.js, PostgreSQL, Redis, Docker, JWT, Google Gemini 2.5 Flash & Pro, Stripe, REST APIs

- Built an AI-powered sermon preparation platform with a guided 7-phase workflow that generates scripture context, outlines and full sermons using Google Gemini LLMs.
- Designed prompt engineering pipelines that carry context across phases to generate sermons, devotionals, series and small-group lesson plans, with AI editing and regeneration.
- Integrated Stripe subscription billing with usage-based AI generation limits and PDF/DOCX export of sermons and devotionals.

AI-Powered HRMS – Human Resource Management System

Website Link : hrm.vcodewonders.com

Tech Stack: Python, FastAPI, React.js, PostgreSQL, Redis, Docker, JWT, LLM, RAG, Vector Database, REST APIs

- Developed an AI-powered HRMS web application with role-based access control for Admin, HR and Employee users, covering onboarding, attendance and leave management.
- Built secure, scalable REST APIs using FastAPI, JWT authentication and PostgreSQL, with Redis caching and Docker containerization.
- Built an AI-powered interview preparation system that analyzes resumes, matches job requirements, and generates personalized MCQs, study guides, and learning plans.

CERTIFICATIONS & TRAINING

Python Full Stack Development Certification — Ocean Academy, 2025 (6-month program)

EDUCATION

Bachelor of Business Administration

2018 – August 2021

Thiruvalluvar University, Tamil Nadu — 79%, First Class with Distinction
